

## Avid Codec LE Update

### ReadMe

---

### Fixed Issue

A Codec LE download is available to fix the following:

- **Bug Number:** UDevC00135898. (Mac OS X - Leopard) When exporting a QuickTime movie with “Use Avid DV Codec” enabled, the exported movie would playback black. An updated Codec LE installer is available on download to fix this issue. You must first uninstall the Avid Codec LE from your system and then run the Codec LE installer.

**(Macintosh) To uninstall the AvidCodecs LE:**

1. Quit all applications.
2. Go to Applications/Avid\_Uninstaller/*AvidCodecsLE*
3. Double-click the *AvidCodecsLE* uninstaller.
4. Follow the on-screen prompts.

**(Macintosh) To install the AvidCodecs LE:**

1. Quit all applications.
2. Download the AvidCodecs LE file located here:  
<http://avid.custkb.com/avid/app/selfservice/search.jsp?DocId=350875>
3. Click to Install the AvidCodecsLE and follow the on screen instructions.
4. When prompted, select “Yes, restart my computer.”
